SHANTANU RAJENDRA CHOTHE

Java Developer (Fresher) | Core Java • JDBC • SQL & MySQL

Kolhapur, Maharashtra | shantanuchothe14@gmail.com | +91 9175189722 | github.com/shantanu1412

CAREER OBJECTIVE

Motivated B.Tech (AI & ML) student seeking a Java Developer fresher role. Strong foundation in Core Java, OOPs, Collections, JDBC and SQL, with hands-on project experience in building database-driven applications, writing test cases and troubleshooting issues. Eager to write clean, maintainable code and grow within a collaborative engineering team.

TECHNICAL SKILLS

Java: Core Java, OOPs, Collections Framework, Exception Handling, JDBC, DAO Pattern, JUnit
Languages: Java, Python, C++, SQL
Databases: MySQL, MongoDB, SQL Queries & Joins, Database Troubleshooting
Web & Tools: HTML, CSS, JavaScript, React, Angular, .NET, Git, GitHub, VS Code
Core Concepts: Data Structures, DBMS, Operating Systems, Networking Basics, Functional/UAT Testing, Log & Error Analysis
AI/ML: Scikit-learn, Deep Learning (CNN, ANN, RNN), NLP, Generative AI

PROJECTS

Inventory & Order Management System | *Java, JDBC, MySQL, JUnit, Git*

- Developed a menu-driven Java application to manage products, customers, stock levels and orders using OOPs principles (encapsulation, inheritance, polymorphism, abstraction).
- Implemented a layered architecture (Model, DAO, Service) with JDBC and MySQL for CRUD operations, using PreparedStatement to prevent SQL injection and Collections (ArrayList, HashMap) for in-memory processing.
- Added custom exceptions and input validation for out-of-stock and invalid-order scenarios, and wrote JUnit test cases to verify business logic.

SQL-Based Order Support & Query Management System | *SQL, MySQL, Python, Excel*

- Designed and maintained an order tracking database, writing queries for data retrieval, validation and report generation.
- Troubleshot data mismatches and application errors by analysing logs, identifying root causes and coordinating fixes; performed functional testing of updates.

Vehicle Insurance Prediction | *Python, Scikit-learn, Pandas, NumPy, SQL*

- Built and deployed an ML model to predict insurance claim likelihood, covering data preprocessing, feature engineering, classification and evaluation with test cases to validate accuracy.

Resume Analyzer | *Python, NLP*

- Built an NLP-based tool that extracts skills, experience and education from resumes and matches keywords against job descriptions.

WORK EXPERIENCE

Data Science & ML Intern — Sunbeam Infotech, Hinjewadi, Pune Dec 2025 – Jan 2026

- Worked on real-world data workflows including data cleaning, validation and issue resolution using Python and SQL-based pipelines.
- Built and deployed a Vehicle Insurance Prediction model; received official internship certification.

EDUCATION

B.Tech in AI & ML (Pursuing) — DKTE Society's Textile & Engineering Institute, Ichalkaranji CGPA: 7.93/10
12th — Govindrao Junior College 2023 | 73%
10th — Vyankatrao High School 2021 | 79.40%

CERTIFICATIONS

- Data Science & ML Internship Certification — Sunbeam Infotech, Hinjewadi (Jan 2026)
